

How to make a balloon chain

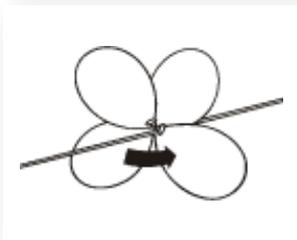

Blow up 2 balloons (in 2 or 4 different colors) in the same size and knot them together.

Then blow up another 2 balloons and knot them together and curl them up with the previous 2 balloons.

Set up a line and wrap the 4 balloons around each other so that they are clamped firmly to the line or directly to the frame of the arch kit. Repeat this step until the line is completely filled with balloons

In this way you can make a balloon chain as long as you want it to be or a balloon arch with the balloon arch kit.
